SUMMARY

Starting from the first year of my university education, I have built proficiency in various technologies through internships at software companies. Throughout this journey, I have gained substantial knowledge and experience in back-end development. More recently, I have concentrated on .NET technologies, further refining my skills and expertise in this domain.

EXPERIENCE

01/2024-07/2024

Acun Medya Akademi - Nişantaşı University

Scholarship Program - Student

- In my training, I gained knowledge and experience in understanding algorithmic logic in software, working effectively with teams, participating in group-based projects, developing projects using .NET Core, working with MVC architecture, and utilizing the Azure platform.

06/2023-09/2023

Sisbim Software Technologies

Intern

- On the back-end side, I gained a lot of experience by working with Asp.net Core, Entity Framework to access data, and MSSQL as a database management system.
- Automation Skills with C#.
- Database Usage Skills
- Actively participating in software development processes and gaining experience with various technologies.

06/2022-09/2022

Belsoft Software Development Technologies

Intern

- Software automation and process improvement with C#.
- Web application development using ASP.NET Core and MVC architecture.
- Data access and management processes using Entity Framework.
- Full-scale work with the software development team.

EDUCATION

2021 - 2024 Konya Technical University

Computer Programming

EXPERTISE

- C#
- .Net Core
- Entity Framework
- MVC
- Layered Architecture
- Asp.Net Core
- API
- Data Base
- MSSQL
- PostgreSQL
- MySQL
- Azure
- PHP
- Python
- Tools
- Git & Github
- Docker

LANGUAGES

- Turkish (Native)
- English (A2)
